

# BULK DEF TRAILERS

990 GALLONS

## MAINTAIN DEF PURITY IN OFF-ROAD ENVIRONMENTS

Thunder Creek's 990-gallon Bulk Diesel Exhaust Fluid Trailers are the convenient solution for transferring DEF from a bulk supply to your heavy machinery.

Bulk DEF trailers come standard with an industrial grade 12V DEF pump, 35' auto-retracting hose reel, and interchangeable auto-trip nozzle with a Micro-Matic® RSV fill and dispense coupler. Optionally, the Bulk DEF Trailer can be enhanced with a gas-powered pump and custody transfer meter with ticket printer.

Like all Thunder Creek trailers, these feature rugged craftsmanship to withstand the toughest environments. Tanks are constructed with 7 gauge stainless steel with multiple full height baffles and double welded seams. These details are critical to building a trailer that tows smoothly at highway speeds and easily navigates off-road terrain.

Bulk Diesel Exhaust Fluid trailers are built in strict adherence to the ISO-22241 standard for maintaining the purity of DEF.
